By using these amenities and common areas, you voluntarily assume the risk that you or other members of your party may be exposed to or infected by COVID-19 or other diseases such as the flu and that such exposure or infection may result in a serious medical condition, including personal injury, illness, permanent disability or death. By using this home or these amenities, you are accepting sole responsibility for such risks and/or occurrences that you or other members of your party may experience or incur as a result of such use and you forever release, waive, relinquish and discharge the property manager, the homeowner and all directors, officers, employees, agents or other representatives of the property manager and/or homeowner (the "Representatives") from any and all claims, demands, liabilities, rights, damages, expenses and cause of action of whatever kind or nature, and any other losses of any kind, whether known or unknown, foreseen or unforeseen, as a result of you and your party being a guest at this vacation home. Manager or Owner will put forth a diligent effort to schedule a pest control service call when notified of insects or pests, but tenant understands the scheduling of a pest control service appointment is subject to the local pest control service vendors availability.

Air Conditioning (AC)

You may find a sign on the A/C unit requesting the temperature not to be set below 74 degrees to prevent the unit from freezing.

In the winter months, when temperatures are not exceeding 80 degrees, the thermostat may be set between 70-72 degrees if preferred.

Common misunderstandings about how the AC works-A lower number on the thermostat does not mean cooler air. Generally speaking, the air conditioning system is designed to accommodate up to an 18-20 degree difference between the outside air and the inside.

SW Florida is a sub-tropical climate with very warm and humid temperatures in the Spring, Summer & Fall months. The outdoor temps can exceed 100 degrees during these months. Therefore, the AC is not likely to cool the inside temps of the property less or much less than a 20 degree difference from the outside temps.

This does not always mean the AC is not working or is defective but rather performing at its manufactured designed potential. Keeping the windows, doors and window coverings closed and running ceiling fans & fans can assist with helping keep the inside property temps as cool as possible.

The property owner and manager and not requesting or suggesting the above thermostat settings to be unreasonable, but rather as a preventative measure and to the rental guests benefit to help avoid the AC from freezing up. When the lower thermostat setting commands the AC to run for longer periods of time to reach a temperature that it will likely not be able to reach, the AC coil will freeze up.

When this happens it can take several hours to a couple of days to thaw the AC coil so the AC can then be serviced and repaired to work again. All the while there will be no AC working in the property.

Refunds or credits will not be made for AC failure resulting in the aforementioned.

POOL, PATIO, Dock & Canal

Tenant hereby acknowledges that the premises they have reserved may include a community or private pool, patio/deck, dock and/or canal and the Tenant agrees and acknowledges that the community or private pool, patio/deck, dock and/or canal can be dangerous areas, that the pool deck/patio and dock can be slippery when wet, and that injury may occur to anyone who is not careful.

With full knowledge of the above facts and warnings, the undersigned Tenant accepts and assumes all risks involved to Tenant and all of Tenant's guests in or related to the use of the community or private pool, patio/deck, dock and/or canal areas to include supervision of all children. **No diving in pool!**

The undersigned Tenant, for himself/herself, his/her heirs, assignors, executors, and administrators, fully releases and discharges iTrip and Owner and from any and all liabilities, claims, demands, and causes of action by reason of any injury, loss of damage by whatever nature which has or have occurred, or may occur to the undersigned, or any of his/her guests as a result, or in connection with the occupancy of the premises and agrees to hold iTrip and Owner free and harmless of any claim or suit arising there from.

Pool Homes: Pools are serviced weekly. The pool vendor policy is **not** to knock on the front door nor engage rental guests and to apply social distancing. They will go directly to the pool upon their arrival to perform the weekly service.

The electric heated pool thermostat settings are established and set by the property owner and their pool service company between 83-86 degrees.

Although the home has a electric heat pump or solar panels, please understand the water temperature is still affected by the outdoor temperature and overall weather conditions and therefore the ability for the heat pump or solar panels to keep up the temperature settings in the cooler winter months.

Solar heated pools-the amount of available sunshine, wind speed, and ambient air temperature all play a role in how efficient a rooftop solar panel pool heater is on any given day.

Damage caused by guest to the pool, spa and/or mechanical's will be charged to the guest account. Any pool technician service calls needed to be placed by owner or management because of guest misuse or operational error will also be charged to the guest account.

Pool is a residential pool and cleaned weekly by owners pool service company. Extra cleaning requests will be charged to guest account.

The pool pump & heater are set to run daily as prescribed by the owners pool service company. Please also do not touch timer settings.

No diving and guests swim at their own risk.
